OLENA KRYVONIS
FRONT-END WEB DEVELOPER

Virginia Beach, VA 23455| Cell: (757) 679-1758| Email: 23451vbva@gmail.com|

PROFESSIONAL SUMMARY

- Front-End React developer with 5+ years of experience. Participated in successful projects, demonstrating critical thinking and self-teaching skills
- Provide timely status and feedback to management, team leaders and project sponsors as required through clear communication when providing responding to questions and setting expectations.
- Keep manage of new technologies through formal and self-paced professional development.
- Can quickly learn new features and applications to improve creative solutions for the lines of business.
- Built the unit tests to improve components to ensure features, functions with the best impact on members/users and ensuring systems are easily maintainable.
- Collaborated with cross-functional teams to deliver high-quality software solutions using .NET.

CORE COMPETENCIES AND TECHNICAL SKILLS

- HTML5
- CSS3 & SASS, Responsive Web Design
- JavaScript, including Syntax, ES6, Database, Objects, asynchronous requests.
- React.JS, Redux, Axios
- GraphQl, REST APIs
- TypeScript
- Node.JS
- Project Management Systems (JIRA), VS Code, WS
- Version Control Systems (Git, GitHub)
- Design tools (Figma, Photoshop, Material UI, Bootstrap)
- SQL, MongoDB
- Cypress, Jest

EXPERIENCE AND PROJECTS

Hertz services INC. Atlanta, GA 2020 - present

- Work within a collaborative team of engineers and developers where build a business growth management platform to run multiple tasks, have access to financing and successful transactions. What helped companies build their reputation and has raised more transactions each month.
- Serve as one of the technical experts on the front-end team. My day-to-day work requires me to cooperate with product managers, designers, and engineers from multiple teams. Help to solve the hard engineering problems of scaling products, reducing latency, ensuring security, improving technical excellence.
- **Technologies used**: React.JS, Redux, Axios, GraphQL, PassportJS, Material UI, Bootstrap, Git, GitHub, Figma, TypeScript, MongoDB, Cypress, Jest, REST APIs

Wallstickers4you. Denver, CO 2017 – 2020

- Built new entities and scalable components for different purposes. Designed created and useful privileges and ranking the products. Rebuild a massive part of an old-written code in React and Redux. As a result, improved the loading speed at least 2 times. This increased the sales 5 times during first 6 weeks. Refactoring the class components to functional throughout the project's client side.
- I switched from AntDesign, which didn't work well with multiple function forms and was difficult to maintain, to Material UI, which was smoothly implemented, within 2 weeks for a couple of components a day. This led to increase in loading time, and more than 5000 positive feedbacks from customers.

Technologies used: React.JS, Redux, Material UI, Bootstrap, AntDesign, Git, GitHub, TypeScript

Education:

Bachelor of Science in Computer Science (Incomplete due to War in Ukraine)
V.O. Sukhomlynsky National University of Mykolayiv | Mykolaiv, | Mykolayiv, Ukraine
- GPA: 9.2/10.0
